## Girls' Day at Topas - 3rd April 2025

---

On Girls' Day on April 3, 2025, **six girls aged 12 to 14** from various high schools and secondary schools in Dresden had the opportunity to spend a few hours with us to immerse in the exciting world of particles, aerosols, and filtration. However, therefore we needed some help...

During the **subsequent tour** of the company and our Technical Innovation Center, the students also got to know many other departments.

Whether in series production, mechanics, or engineering, everyone was happy to **explain things** and take time for **questions**.

...because the male “Topases” had prepared a few things as well. There were **spontaneous explanations with a demonstration** at our largest test system for general air filters, the ALF 114, many interesting conversations in the offices, and even a **short presentation** on our support for cancer research.
